

PROFESSIONAL SUMMARY

Full-stack developer working mainly in .NET and React, with hands-on backend and frontend experience across SQL Server, EF Core, React, and Angular. Contributed to the architecture and backend of Tawreed, a B2B group purchasing platform for small businesses, working with Clean Architecture, ASP.NET Core, JWT authentication, and role-based access control. Also work across the MERN stack and have shipped a live Arabic RTL e-commerce platform with React and Node. Comfortable working across the stack from database schema to UI.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, C#, C++, Python, SQL
- **Frontend:** React.js, Next.js, Angular, Tailwind CSS, Bootstrap, HTML5, CSS3
- **Backend:** Node.js, Express.js, ASP.NET Core Web API, Entity Framework Core, GraphQL
- **Databases:** MongoDB, Mongoose, SQL Server, Prisma ORM
- **Authentication:** JWT, ASP.NET Identity, Role-Based Access Control
- **Tools:** Git, GitHub, Postman, VS Code, Docker (Basic)
- **Concepts:** REST APIs, OOP, Design Patterns, Clean Architecture, DDD, Agile Methodology, Team Leadership

PROJECTS

- **Tawreed – Group Purchasing Platform for Small Businesses** <https://tawreed-frontend.vercel.app/>
Contributor – Architecture & Backend Development on a B2B platform connecting small business buyers with suppliers for bulk ordering 2026
 - Contributed to system architecture and backend design for a B2B group purchasing platform that lets small businesses pool orders and access supplier pricing normally reserved for bulk buyers.
 - Worked on backend implementation using ASP.NET Core Web API, C#, Entity Framework Core, SQL Server, and ASP.NET Identity, applying Clean Architecture principles.
 - Contributed to authentication and role-based authorization logic using JWT and FluentValidation.
 - Applied Repository Pattern, Service Layer architecture, dependency injection, and DTO mapping in assigned modules.
- **Herfy Clone Web App** <https://herfey-client-side.vercel.app/en>
<https://herafy-admin.vercel.app>
Team Lead – Full-stack Arabic e-commerce platform with RTL support, 4-person team 2025
 - Led a 4-person team as formally assigned team lead: assigned tasks, reviewed pull requests, and made architecture decisions.
 - Built using React.js, Tailwind CSS, Node.js, Express.js, MongoDB, and TypeScript.
 - Implemented role-based authorization, JWT authentication, cart management, checkout workflows, and order management.
 - Managed application state using Redux Toolkit, Context API, and TanStack Query.
- **Customer Support Request Management – Backend System** <https://github.com/Abotareq/customer-service>
Solo – DDD/Clean Architecture backend for handling and routing customer support requests 2026
 - Designed and built a Clean Architecture backend with DDD and CQRS (MediatR), covering request submission, assignment, status changes, and messaging between customers and agents.
 - Implemented JWT authentication with refresh token rotation, email verification, and forgot/reset password flows using ASP.NET Identity.
 - Added real-time message delivery with SignalR, broadcasting updates per request to connected customers and agents.
 - Enforced role-based and resource-level authorization so customers, agents, and managers each see only the requests they should.

EXPERIENCE

- **Software Full-Stack Engineer Trainee** 2026
Next for Technology Development, Cairo, Egypt
 - Built and deployed full-stack features end to end: ASP.NET Core Web APIs backed by SQL Server and EF Core, paired with React front ends.
 - Implemented JWT authentication and role-based authorization across a layered architecture.
 - Used Git branching and pull request workflows in a team setting.
- **MEARN Stack Trainee** 2025
Information Technology Institute (ITI), Egypt
 - Built full-stack applications on the MERN stack: Express and Node APIs, MongoDB schemas, React and Angular front ends.
 - Built and integrated RESTful APIs between frontend and backend layers.
 - Worked in a team using Git version control and Agile sprints.

EDUCATION

- **Bachelor of Science (BS) in Computer Science** 2019–2024
Dual-accredited program: University of Greenwich & October University for Modern Sciences & Arts (MSA), Egypt Grade: Good

LANGUAGES

- **Arabic:** Native
- **English:** Very Good

Military Service: Exempt · Nationality: Egyptian
